- I consent that Tomlinson Equine can add my email address to their mailing list to receive information about future offers and services.
- I consent that my name can be passed onto the Stallion Owner/Agent for invoicing and data analysis purposes (**required**)
- I consent that my name and email address can be passed onto the Stallion Owner/Agent to be added to their mailing list to receive information about future offers and services.

Tomlinson Equine Stallion Terms and Conditions

All semen received must be used only on the mare nominated. The stud fee does not include the collection cost/shipping fee or any stallion transport costs applicable (currently Britannia's Mail and Britannia's Bijou), please request these prices separately. The Stud Fee, collection fee/shipping costs are payable before the first consignment of semen is sent out. Please ensure the Certificate of Insemination is completed & returned to Tomlinson Equine as soon as possible after Insemination. If multiple pregnancies are achieved from the same procedure, the full stud fee will be charged for each additional pregnancy on confirmation of a heartbeat unless otherwise agreed in advance in writing. In the case of not achieving a pregnancy, further semen consignments will be sent out only after receipt of a completed Certificate of Pregnancy Diagnosis and payment of stallion transport/semen collection/shipping costs. Please see individual stallion's current Stud Card for details of Stud Fee Terms (e.g. stallion transport costs, live foal guarantee, no foal free return). The number of doses of frozen semen per stud fee is limited to 4 doses unless otherwise agreed in writing under exceptional circumstances. Should no pregnancy be achieved in the nominated breeding season, the mare owner may use the nominated stallion the following season on the same terms, on the condition that a veterinary certificate is provided to confirm that the Mare was not pregnant. All un-used frozen semen straws must be returned (at the mare owner's cost) to Tomlinson Equine as soon as possible after it is no longer needed. Neither Tomlinson Equine nor the stallion owner is responsible for any frozen semen storage costs that occur whilst the semen is not at Tomlinson Equine. Please be aware that some Warmblood stallions may be positive for the WFSS gene and we recommend that all Warmblood mares are tested for this, it is not recommended that a WFSS positive mare is bred with a WFSS positive stallion. Currently Britannia's Mail has been tested and is known to be carrying the WFSS gene.

Tomlinson Equine recommend using veterinary practices registered on the BEVA AI list for all inseminations.

I confirm and agree to Tomlinson Equine's Terms and Conditions and have read the Tomlinson Equine Stud Card for the above-named stallion.
