

Tomlinson Equine

Practical Equine Embryo Flushing & Searching Course Monday 5th February 2024

Tomlinson Equine is a specialist Equine Reproduction Centre. Our course is designed to teach equine practitioners, already competent in equine reproduction, how to perform a uterine flushing for embryo recovery, as well as search for a flushed embryo and prepare the embryo for chilled transportation. This course is run over one day and offers in-depth practical teaching, allowing delegates to perform the procedures necessary and discuss the process with our team.
